

Road To Success
E-trucking for increased visibility,
reduced time and optimised cost

Challenges

- Uncertainty before truck arrival
 - ✓ Truck arrival time
 - ✓ Type of truck ordered vs reported
 - ✓ Condition of truck i.e flooring , cleanliness etc
 - ✓ Back ground of driver

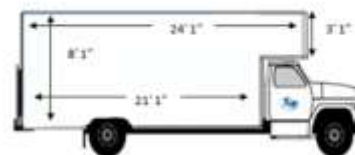

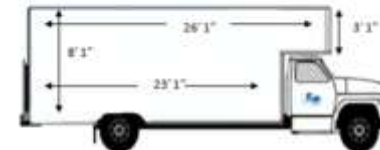

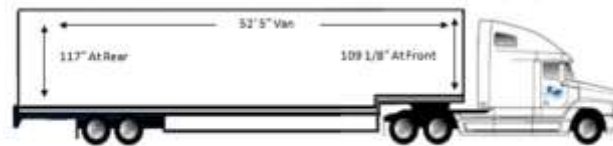

CHALLENGES IN FULL TRUCKLOAD
FREIGHT MANAGEMENT

Challenges

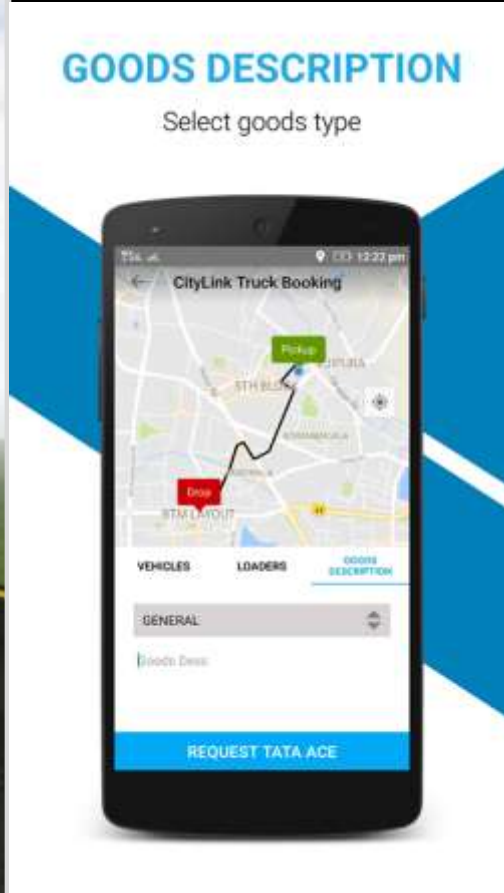

➤ Uncertainty after truck arrival

- ✓ Truck capacity utilisation i.e the ordered truck may be of higher capacity than required
- ✓ Errors in documentation which might lead to truck seizure
- ✓ Ambiguity over detention time at the source and destination

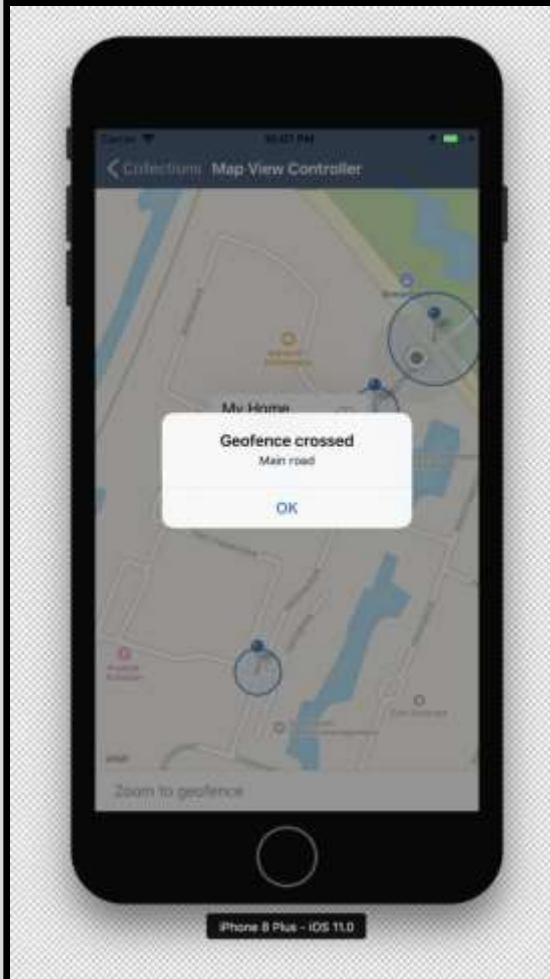

SCM eTrucking

- Client may book a truck using our app “Pickup request”
- Pre-alert on allocation of truck and truck driver
- History of truck trips in the past and authenticity of driver is assured
- Vehicle quality check and vehicle suitability report shared on app

SCM eTrucking

- Pre-alert when vehicle enters the geo-fence of the client for loading
- Report on usage of loading staff by client or transporter
- Vehicle utilisation report and time of leaving the clients factory
- Close monitoring of vehicle during transit i.e
 - ✓ Speed of the Vehicle
 - ✓ Scheduled and unscheduled stoppages

SCM eTrucking

- ✓ ETA and pre-alert as soon as vehicle enters the geo-fence of destination
- ✓ Arrival quality check and seal intactness report
- ✓ Report on Time taken during unloading

SCM eTrucking

- ✓ Proof of Delivery available on app
- ✓ Instant Invoicing along with live comments to settle the dispute if any
- ✓ Integration with your software through API

We step in, so you can move forward!
